SKILLS

- **Programming:** Java, JavaScript
- **Web Development:** HTML, CSS, React.js
- **Database:** MySQL
- **Tools:** Git, VS Code, Postman, Excel

INTERNSHIP

Intern

Sep 2023 – Mar 2024

SEVEN MENTOR Pvt Ltd

Pune, Maharashtra

- Developed a full-stack E-blogging platform using Spring Boot, showcasing expertise in Java, Spring MVC, RESTful APIs, and database integration.
- Identified and resolved issues in the codebase by leveraging Core Java expertise and problem-solving skills.
- Integrated MySQL with the backend Java system, optimizing database interactions for improved performance and reliability.

Web Development

Internshala Trainings, Online

Oct 2021 - Nov 2021

- Successfully completed a 8 weeks online certified training on Web Development. The training consisted of HTML, CSS, Bootstrap, JS, React, and Final Project modules.

PROJECTS

• Personal Portfolio –HTML, CSS, JavaScript

I created my own personal portfolio website to showcase my projects, skills, and achievements in one place. The website has a clean and responsive design so it works well on both computers and mobile devices. I added different sections like an “About Me” page, a project gallery to display my work, and a contact form for visitors to reach out to me. I designed the layout using HTML and CSS and made it interactive with JavaScript. I also keep the content updated regularly so that it always reflects my latest skills and projects. This project helped me practice web design, responsiveness, and basic interactivity.

- **W3Schools Clone – HTML, CSS, React.js**

I developed a clone of the W3Schools website using React.js to practice front-end development skills. The project includes multiple pages such as tutorials and examples, connected with smooth navigation. I used HTML and CSS to design a clean layout that looks similar to the original site while keeping it responsive for different screen sizes. This project helped me understand how to create reusable React components, manage routing between pages, and style the application effectively.

- **E-Blogs Platform – Java, Spring Boot, MySQL**

I built a blogging website where users can sign up, log in, and write blogs. It has user authentication for secure login and role-based access to give different permissions to users and admins. The backend was made using Spring Boot, and MySQL was used to store user accounts, blog posts, and comments. This project helped me understand how to connect a website with a database and manage secure user access.

EDUCATION

D.Y. Patil University, Pune

2023 – 2025

MBA in Artificial Intelligence and Machine Learning

CGPA: 8.75

Sandip Institute of Technology and Research Centre, Nashik

2019 - 2023

Bachelor of Engineering in Information Technology

CGPA: 7.69

LANGUAGES

- English
- Hindi
- Marathi
